Comment by Mr. Miguel Ángel Peirano, Chief Executive Officer

“We are very satisfied with the work performed during 2015 leading to the attainment of this year’s results. In financial terms, the Company’s consolidated Net Income and EBITDA improved by 16.4% and 9.1%, respectively in the year with expansion of EBITDA margins in all franchises where we operate. In operating terms, the excellent execution of our market strategy at the point of sale allowed us to improve our customer service, resulting in market share gains in Brazil, Chile and Paraguay, and maintaining this indicator in Argentina. Also, thanks to an appropriate pricing strategy designed for each of our operations, the Company’s consolidated sales improved by approximately 4.5%, outweighing the strong impact the devaluations of local currencies with respect to the Chilean peso had over our results and consolidation. We continue preparing for the future, during the year 2015 we carried out investments that will allow us to increase the versatility of our production processes to adapt to the increased demands that will arise in each of the countries where we operate; that is how we started with the first stage of the construction of the Duque de Caxias plant in Brazil and formalized the new model of Stills in Chile. We have a flexible investment plan which allows adapting to the changing economic conditions of the countries where we operate. We view 2016 as a challenging year in which we will continue to consolidate our leadership position in each of the countries and businesses in which we participate, leveraged on the search for efficiency improvements in our processes, in order to continue with the value growth generated for our customers, consumers, workers and shareholders.”

CONSOLIDATED SUMMARY

4th Quarter 2015 vs. 4th Quarter 2014

All figures included in this analysis are set according to IFRS, in nominal Chilean Pesos. All variations regarding 2014 are in nominal terms. On average during the quarter, the Argentine Peso, the Brazilian Real, the Chilean Peso and the Paraguayan Guarani depreciated against the U.S. Dollar by 19.5%, 51.0%, 16.6% and 23.6% respectively. The Argentine Peso, the Brazilian Real and the Paraguayan Guarani depreciated against the Chilean Peso by 2.4, 22.8% and 5.7%, respectively. This generated a negative accounting impact on the conversion of figures.

Consolidated Sales Volume for the quarter reached 233.6 million unit cases, decreasing 2.5% with respect to the same period of 2014, explained by a contraction in soft drink volumes, which was not able to be offset by the growth of the other categories. Additionally, we had market share gains in the four countries where we operate. Our Sales Volume was affected by macroeconomic factors which are negatively impacting the economies of the countries where we operate having an effect over consumption, especially in Brazil, as well as more unfavorable weather conditions.

Net Sales reached Ch\$530,572 million, a 1.3% decrease, explained by the aforementioned volume contraction and the effect upon translation of figures given the depreciation of local currencies with respect to the Chilean Peso. This was partially offset by price increases in all of the franchises where we operate.

Operating Costs decreased 1.5%, which is mainly explained by (i) the effect of lower volumes and (ii) the effect of translation of figures from our subsidiaries in Argentina, Brazil and Paraguay. The foregoing was partially offset by (i) the depreciation of local currencies regarding the U.S. Dollar, which has a negative effect on the value of U.S. Dollar denominated raw materials, (ii) increased sales, having a direct incidence over concentrate costs; and (iii) higher labor costs in Argentina.

Selling, General and Administrative Expenses (SG&As) decreased 0.5% mainly due to (i) lower marketing expenses in Brazil, Chile and Paraguay. This was partially offset by (i) local inflations, particularly in Argentina, which affects the majority of these expenses, specially labor costs and (ii) greater labor costs in Brazil, Chile and Paraguay.

The foregoing mentioned impacts, led to a Consolidated Operating Income of Ch\$70,494 million, a decrease of 1.4%. Operating Margin was 13.3%.

Consolidated EBITDA amounted to Ch\$95,446 million, dropping 2.2%. EBITDA Margin was 18.0%.

Net Income Attributable to the Controllers for the quarter was Ch\$30,211 million and net margin reached 5.7%.

SUMMARY BY COUNTRY: ARGENTINA

4th Quarter 2015 vs. 4th Quarter 2014

For a better understanding of Argentine Operations, we include figures in local nominal currency.

Sales Volume for the quarter decreased 1.2%, reaching 67.1 million unit cases, explained by a contraction in soft drinks which was partially offset by the growth in the juices and waters categories. Our soft drinks market share reached 62.6 points, increasing 20 basis points with respect to same period of the previous year.

Net Sales reached Ch\$188,230 million, a 22.8% increase, explained by the implementation of price increases and partially offset by (i) a reduction of sales volume and (ii) the negative effect of the depreciation of local currency regarding the reporting currency upon consolidation of figures. In local currency, Net Sales increased 26.8%.

Operating Costs increased 17.3%, explained by (i) increased sales, which has a direct incidence over concentrate costs, (ii) increased labor costs, mainly as a consequence of local inflation, and (iii) the devaluation effect of the Argentine Peso over our costs expressed in US Dollars. In local currency Operating Costs increased 20.8%.

SG&A expenses increased 22.0%, principally explained by the effect of local inflation upon expenses such as labor, freights and services provided by third parties. In local currency SG&A expenses increased 26.5%.

OTHER INFORMATION

- Net Financial Income and Expense account recorded an Ch\$8,770 million expense, which is compared to a Ch\$14,628 million expense for the same quarter of the previous year, mainly explained by a lower indebtedness level in Argentina and Brazil, and the effect on translation of figures due to the depreciation of the Brazilian Real against the Chilean Peso.
